6 7, 2001. The application filed herewith is a divisional application of application serial no.
09/924,201.

7 Claim to priority of earlier filed application:

8 Applicant hereby asserts a claim of priority under 35 U.S.C. § 120 to co-pending
9 U.S. Patent Application Serial No. 09/924,201. The application filed herewith is a
10 divisional application of application serial no. 09/924,201.

11 Cancellation of claims:

12 Claims 1-4, 6, 7, 13 and 15 have been canceled as noted above because they
13 are drawn toward a previously prosecuted species.

14 Amendments to claims:

15 Claims 5, 8, 9, 14, 19 and 20 have been amended as shown above.

16 Claim 5 formerly depended from claim 1 which has been canceled as noted
17 above. Accordingly, claim 5 has been amended herein so as to be put into independent
18 form and so as to include the elements of claim 1. Furthermore, the element "a host
19 device" has been added to claim 5 in response to the Examiner's comments contained in
20 the Office action mailed on 05/14/2003 relating to claim 1 of the above referenced parent
application.

21 Similarly, claim 8 formerly depended from claim 7 which has been canceled as
22 noted above. Accordingly, claim 8 has been amended herein so as to be put into
23 independent form and so as to include the elements of claim 7. Furthermore, the
24 element "a host device" has been added to claim 8 in response to the Examiner's
25 comments contained in the Office action mailed on 05/14/2003 relating to claim 1 of the
above referenced parent application.

Claim 9 also formerly depended from claim 7 and has been amended to be put
into independent form and to include the elements of claim 7 and to include the element
"a host device" for the reasons set forth above with respect to claims 5 and 8.

1 Claim 14 formerly depended from claim 13 which depended from claim 7. Both
2 claims 7 and 13 have been canceled as noted above. Accordingly, claim 14 has been
3 amended herein so as to be put into independent form and so as to substantially include
4 the elements of claims 7 and 13 in light of the previous amendments to claim 15 which
5 also depended from claim 13, and which was allowed as a result of prosecution of the
6 above referenced parent application.

7 Claim 17 has been amended to correct a typographical error. Specifically, in line
8 3 of claim 17, the term "hard disk memory device" has been corrected so as to read,
9 "hard disk memory medium."

10 Claims 19 and 20 have been amended so as to more clearly recite what is being
11 claimed. That is, no new elements have been added to claims 19 and 20, but rather the
12 manner in which the elements are presented has been changed to be more precise.

13 New claims:

14 Newly written claims 21-27 are initially presented herein. Support for claims 21-
15 27 is found in the specification at page 10, line 6 through page 19, line 18, as well as in
16 the accompanying drawings.

17 Summary:

18 The Applicant hereby requests timely and favorable action regarding the merits of
19 claims 5, 8, 9, 14 and 19-27.

20 Respectfully submitted,
21 Stephen Deckers
